INHOUSE **ISOLATION ROOMS** FOR COMPANIES

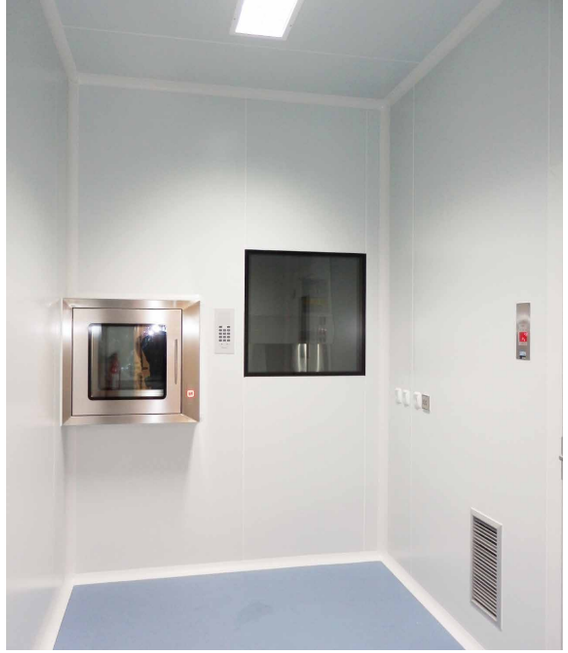

PUREVER tech

CLEANROOM TECHNOLOGY

PURETECHROOM EXPRESS

The simplest, fastest and most cost-effective way of implementing an easy-to-clean isolating room.

Delivered in dismantled modules, with or without flooring and a simple layout with one airlock (PAL) and the following components.

PATIENT ISOLATION ROOMS BUILT IN 2 WEEKS

Purever Tech, Cleanroom Solution Brand of Purever Industries and a renowned provider for **modular cleanroom solutions** presents 2 solutions for patient isolation that are **completely functional and quick and easy to assemble with very short delivery times**.

Due to the global pandemic of COVID-19, demand of isolation rooms has been rising. Purever Tech worked out a proposal of **Inhouse isolation rooms for companies**.

Many companies keep on functioning and some areas of operation, like production, are not possible to be performed via home office. With the imminent risk of infection among the staff, companies need to be prepared.

In the case of an employee showing symptoms, health authorities demand immediate isolation of this person. This modular room allows you to isolate a sick person and complies with the necessary specs and equipment, while waiting for the public health systems response.

PURE TECH Systems©

Purever Tech offers an easy-to-build modular system, that can be installed inside already existing rooms or in storage and logistics areas.

After the pandemic has passed, this room can be modified or moved without any structural changes of the host building. Each room can be set up, taken down and reassembled **effortlessly and time efficiently** without damage to the main components.

Purever Tech is a brand of the industrial group:

PUREVER INDUSTRIES

- *Operating in the industrial sector since 1991*
- *Certified quality*
- *Environmentally friendly*
- *Own production sites*

WITHOUT BATHROOM

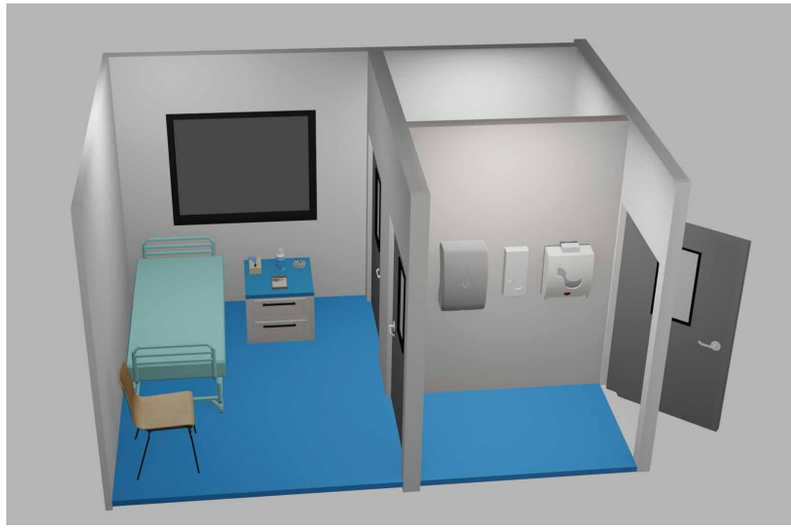

- 2 Interlocking doors with control and signalling devices
- 1 Stainless steel hand sanitizer
- 2 Stainless steel dispensers (for gloves, facemasks, etc.)
- 1 Stainless steel cabinet
- 1 Working table
- 1 Bed
- Skirting / coving profiles
- Pass through

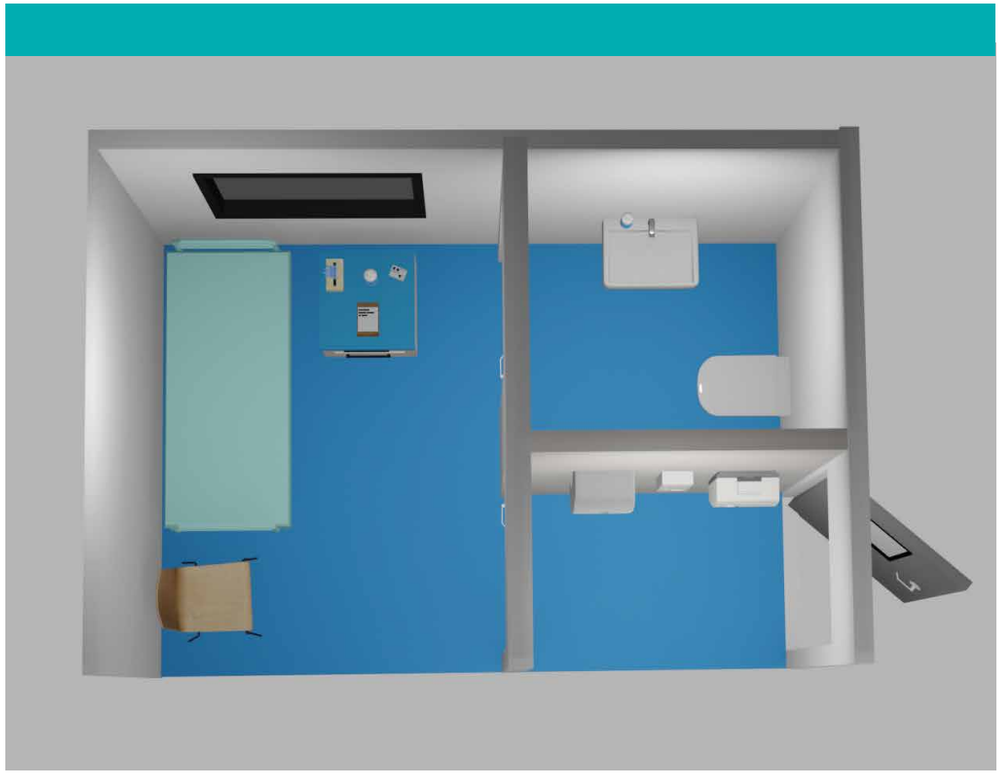

WITH BATHROOM

- 2 Interlocking doors with control and signaling devices
- 1 Door
- 2 Stainless steel hand sanitizer
- 1 Stainless steel sinks
- 2 Stainless steel dispensers
- 1 Stainless steel cabinet
- 1 Stainless steel trash bin
- 1 Working table
- 1 Bed
- Skirting / coving profiles
- Pass through

OPTIONS:

FLOORING

- No flooring, using the existing floor
- Floor panels with non-slip phenolic resin or stainless steel finish
- Vinyl flooring (cleanroom quality)

EQUIPMENT

- Intercom
- Coat rack
- Air purifier
- Additional stainless steel dispensers
- Additional stainless steel hand sanitizer
- Stainless steel trash bin
- Chemical toilet (no connection to sewage needed)

BUILDING SOLUTIONS
FOR CLEANROOMS

More than 25 years of experience as manufacturers of panels and components for cleanrooms in different industrial sectors have enriched our knowledge and expertise in the design and implementation of complete construction systems for controlled environments.

We are working with **Pure Tech Systems**, a smart modular building system that transforms our clients' production areas into customised cleanrooms.

Where possible, it can be modified, moved and reused, maintaining all its characteristics and is undergoing constant innovation, in compliance with European and international standards.

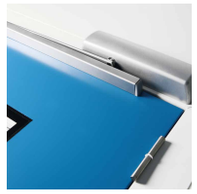

PURE TECH Systems©

SMART CONSTRUCTION SYSTEM

ADVICE BASED ON EXPERIENCE

After executing more than 500 projects in 20 countries around the world, we can guide our clients through their projects in the pharmaceutical, veterinary, cosmetics, food and nutraceutical industries, as well as in technology, hospitality and scientific industries.

CUSTOMISED DESIGN

We analyse our clients' requirements to propose a technical solution with a harmonious balance between quality, price and classification demands, fitted to their needs.

Our ample product range allows us to configure a unique and made-to-measure cleanroom for each project, optimising time, space and resources.

FIRST-HAND KNOWLEDGE

Experiencing the challenges of in-house production on a daily basis enriches us with first-hand knowledge, allowing us to provide immediate responses to their requests, ensuring delivery times and adjust aspects of the production, as well as guarantee superior quality at a price that only a manufacturer can offer.
